

150KW Rental Electric Heater Therm-Air PHH 150

Versatile Heating Solution

Large horizontal heat unit is mounted on a 4-way lifting/mounting pod. Up to four stages of heat provide for the heat output to match the load requirements. The units use high static non-overloading blowers to move the heated air through the flexible ducts to the space being heated.

The heavy duty welded cabinet can be stacked for storage to save valuable floor space. Corner brackets allow lifting of the unit.

Multiple safety features for almost all temporary heating applications.

Product Features

- Duct Collars
- Durable Finned Tubular Heaters
- Welded Stackable Cabinet
- Lifting Corner Brackets
- Slotted Vise Action Latches on Access Panels
- Durable White Powder Coat Finish
- Main Circuit Breaker
- Cleanable Filters
- On/Off Switch
- Isolated Variable Frequency Drive (VFD)
- Unit Mounted Thermostat

Product Specifications

Performance Data

CFM	5000
Temp Rise	150° F
BTU's Per Hour	512,000

Electrical

Requirements	480V (3 Phase)
FLA	225 Amps
Power Cord	2/0×4 Wire
Watts	150,000

Dimensions

Width×Depth×Height	42×72×48 in.
Weight	2000 lbs.
