

2,000 Gallon Rental Fuel Tank

Western Global- TransCube 100TCG

STATIONARY FUEL STORAGE TANK

The TransCube Standby 100TCG is a 2,232 gallon stationary storage tank built for onsite equipment refueling and backup fuel supply.

With a full-height lockable equipment cabinet and a galvanized frame, the 100TCG allows you to strategically locate bulk fuel onsite and prevent fuel delivery downtime.

PRODUCT SPECIFICATIONS

Capacity	2,000 gallons
Dimensions (L×W×H)	99×89×101 in.
Weight (empty)	7,600 lbs.
Weight (full)	27,362 lbs.

PRODUCT FEATURES

- Environmentally friendly - The built in, double-walled and weather proof 110% secondary containment eliminates the need for pans or basins.
- Durable - The galvanized frame prevents bumps & dings from forming on the fuel tank.
- Secure - The full height equipment cabinet has a 3-point locking system on the door and features a feed and return hose letterbox. Since fueling is enabled while the cabinet is locked, your fuel is protected from theft and the elements.
- Accessible - Access manway enables easy maintenance and inspection of inner tank.
- Mobile (when empty) - The lifting corner brackets, 4-way forklift pockets and internal baffles make the TransCube Standby easy to transport and maneuver when empty.
