

225 Ton Rental Air Cooled Chiller Trane RTAE225

STEALTH AIR-COOLED CHILLER

The Trane® Stealth air-cooled chiller delivers an industry-leading combination of part-load efficiency and full-load efficiency. Multiple InvisiSound acoustical treatment options provide the flexibility to meet specific application needs and the InvisiSound™ Ultimate package produces the lowest published sound levels in the industry as well as industry-leading efficiencies with no need to compromise.

Product Features

- Air-cooled chiller AdaptiSpeed™ technology
- Durability and performance: delivering improved reliability and lower maintenance requirements with technologies designed to last the life of the chiller, and features like all-aluminum condenser coils to minimize the risk of galvanic corrosion and coils' transverse "open V" design to allow easier cleaning from the inside out, to help keep the air-cooled chiller operating at peak efficiency.

Product Specifications

Evaporator Data

Design Flow Rate	516 gpm
Pressure Drop	14.4 ft
Fluid	Water
Water Volume	140 gal.

Condenser Data

Ambient Temperature	95° F
---------------------	-------

Compressor

Scrollt	2
Refrigeran	R134A

Flow Rate

Minimum	180
Maximum	800

Electrical

Requirements	460 V 3 Phase 60 H
Fuse Sizer	450 Amps

Dimensions

Width×Length×Height	92×300×105 in.
Weight	18,000 lbs.
