

450,000 BTU Rental Indirect Diesel Heater Frost Fighter OHV 500

Safety. Reliability. Versatility. Performance.

The OHV-500 indirect-fired heater is a highly mobile system designed to provide clean air free from moisture and contaminated fumes. Energy efficient independent air inlets for both heated and combustion air result in quicker winter starts. A remote thermostat provides constant temperature settings and monitoring, and available quick connect ducts disburse heated air over large areas. Perfect for many applications including; concrete curing, hazardous conditions, preheating equipment, temporary industrial heating, warehouses, industrial painting and sandblasting.

Product Features

- Fully Insulated jacket - Cool to the Touch, - plus enhanced efficiency and temperature rise
- Satin Coated Steel + Powder Coated Paint - resists rust and prolongs durability
- Durable Stainless Steel Heat Exchanger - increase heater life
- Universal Duct Attachment - easily attach either Pin Lock or Belt Cuff Duct Styles

Product Specifications

Performance Data

CFM	3,100
Temp Rise	180° F
BTU's Per Hour	450,000

Electrical

Requirements	115V
FLA	15 amp

Fuel

Consumption	2.5 gph
Capacity	35 gal.

Dimensions

Duct Diameter	2×12 in.
Length×Width×Height	35×70×51 in.
Weight	400 lbs.
