

## Rental 1200 Amp ILine Panel

### HIPOWER

#### Rugged Design for Reliability

HiPower's ILine Panel can be used as a temporary power distribution system in industrial plant for shutdowns/maintenance. The I-Line circuit breaker power distribution panelboards can be used on AC or DC systems. This system is suitable for use as service entrance equipment in construction sites, utility plants and refineries, and can provide temporary power for remote work areas, job trailers and man-camps in the oilfields, military and events.

#### Product Features

- Square-D I-line panelboards are UL/C and UL listed under file E33139.
- Available with thermal magnetic, Micrologic and electronic circuit breakers.
- I-Line circuit breakers, with their exclusive plug-on connection design provide superior reliability and performance advantages.
- 15-1200A frame circuit breakers require only a screwdriver and ratcheted firmly onto the bus stack. They are secured in place by a screw.
- The connectors are an integral part of the I-Line circuit breaker, eliminating the assembly of connectors to the bus bar.
- The unique line side connection requires no routine maintenance.
- All tests are conducted in accordance with UL67 and CSA C22.2
- Solid neutral is mounted in the mains compartment with the main lugs.

#### Product Specifications

<b>Rating</b>	1200 amp, 3 phase, 600 VAC, 3 pole, 5 wire
<b>Connector Input</b>	male (4) series 16 CamLock in black, red, blue, white, green
<b>Connector Output</b>	(6) 60 amp welder receptacles plus (4) 400 amp CamLock
<b>Agency Approval</b>	UL Listed
<b>Enclosure Material</b>	aluminum with powder coated finish
<b>Environmental Rating</b>	NEMA 3R
<b>Dimensions (W×L×H)</b>	48×40×79 in.
<b>Approximate Weight</b>	750 lbs.
